

To Succeed in the Market today you must:

- Start Early by visiting your Career Center and keeping an eye on opportunities
- Research industries you're interested in
- Set and accomplish academic and career goals
- Build and develop current and new skills
- Network with professionals

Who We Are

About Us

The Career Center takes pride in guiding students to the next chapter of their professional life. We help students build their portfolios while helping them find internships and careers in their field.

CENTER

How do I build my portfolio?

Introduce Yourself

It's never too early to plan out your career. A simple hello in our office gives you an advantage. The more proactive you are the better we can understand your career path needs.

Resume

Start by writing a resume of all your skills, previous employment, volunteer work, education, and references. A resume should be sleek, easy to read, and concise.

Mock Interviews

Here at the University of Maine at Machias we believe it's our duty to educate our students through a hands on approach. We ask you common applicant questions and follow up with directed questions from your field.

Career Fair Prep

This is a networking opportunity you wouldn't want to miss! Every semester we take students to career fairs so students can practice what we've taught them.

Clipper Care Closet

Don't have the right attire for an interview or banquet? Don't worry, we have a room full of professional clothes for any event.

Senior Boot Camp

We have an impacted workshop where students apply for jobs, prep for interviews, create linked ins, and train for the professional world.

What about Graduate school?

Applying to Grad School doesn't have to be scary. By this point in your academic career you have the majority of your groundwork done! All you have to do is put it together with our help. We'll guide you through the application process.
